

Addy has ADHD, a dynamite personality, and epic creativity.

Uno's Autism comes with awesome math and engineering skills.

ADDY & UNO

and their friends
are NOT your typical kids.
When they harness the powers
associated with their disabilities,
the adventures begin!

Seemore has a hearing impairment and marvelous insight and perception.

Melody has low vision and fantastic hearing and musical talent.

And RJ uses his super strength and gadget-packed wheelchair to zoom his friends to any destination!

HI! I'M ADDY!

Whoa, sorry! Did I just yell that? I'm just SO excited to see you!

This is a show about me and my best buddy Uno. He's the smartest person I know! Uno doesn't like to talk much, but he's so fantastic at math and memory- it's bananas! Don't you just love banana smoothies? I also like chicken nuggets shaped like penguins. Anyway, Uno and I go on adventures every single day. A day without adventures is a day lost in my book. Did I tell you I have a book?

Am I getting ahead of myself? My parents tell me I go off on something called tangents, which sound juicy and delicious.

Anyway, every day at school, a problem or mystery will arise. And then, Uno, our friends and I all put our heads together, dig around in my Cabinet of Wonders, make a GINORMOUS mess, but then come up with a brilliant plan to save the day, using our super abilities!

And then I write all about it in my Book of Adventures.

Man, I love adventures!

According to my super-smart friend Dr. Nava Silton, our adventures accomplish three things:

GOAL 1:

Showcase the talents, strengths, and nuanced abilities of individuals with disabilities. Viewers will recognize the characters by their strengths and unique know-how, learning from them along the way: creative problem-solving from Addy; music theory from Melody; math, engineering, and Spanish from Uno; rocketry and space from RJ, and American Sign Language from Seemore.

GOAL 2:

Promote social development through the characters' unique personalities. This will be especially helpful for viewers on the Autism spectrum, and for viewers at large.

GOAL 3:

Promote a strong stop bullying platform. Address rehabilitating bullies, and portraying them not solely through their negative qualities, but with nuance and complex characteristics.

If you have any questions, you should get in touch with my pal, Dr. Nava Silton!

She would LOVE to talk to you.
